## Graduate Software Developer

ref: 4191

I want to be a software developer. The journey started when I tried to develop a web application to help me communicate with my friends when I was in high school. After that, I try to design some small applications (like calculating for a mobile, and programming for a robot with my high school teacher's help.). I find it interesting to design and build a computer program. When I come to the Victoria University of Wellington, I studied a lot of programming techniques to improve my programming skills. I studied how to design or implement AI algorithms to solve real-life problems.

How to build a web application and mobile application.  
How to design a good project structure and collect data from the interface to the database.

**This candidate is prepared to move within New Zealand for the right opportunity.**

**This candidate is available for full-time work.**

### Skills

- AI algorithm
- Full stack developer

### Experience

- **Volunteer Work**  
For tutorial classmate about AI algorithm
- **Custom Service**  
New World

---

## Database Support Engineer

ref: 4183

Enthusiastic customer service professional with years of experience working as a liaison between consumers and corporations. Skilled communicator and listener with a knack for remedying conflict, and keen organizational skills which allow for effective delivery of outstanding service. Maintain the highest level of integrity, dedicated to providing reliable and friendly service without ever compromising the reputation or competencies of the organization. Competent team player who can successfully inspire fellow colleagues. Expert at learning about new products and technology and later delivering information to customers in a way that is honest, educational and helpful.

**This candidate is only seeking opportunities within the Wellington region.**

**This candidate is available for full-time work.**

## Software Developer or AI Developer

ref: 4162

I am a C++ software developer with about 20 years' experience of designing software in the wireless communication and robotics industries. I have broad experience in solving complex problems and designing software architecture. I am also a very enthusiastic learner with a great passion for learning new technologies, e.g., I developed a Natural Language Processing (NLP) application with excellent performance in the past 1.5 years by self-learning Machine Learning and Python. I am looking for an exciting new challenge with an organisation where I can add great value by utilising my knowledge, experience, and expertise.

**This candidate is prepared to move within New Zealand for the right opportunity.**

**This candidate is available for full-time work.**

### Skills

- Languages: C++, Python
- Design: UML
- Databases: MySQL, Oracle, SQL Server, SQLite, Firebird
- Frameworks: STL, QT, MFC, Adaptive Communication Environment (ACE)
- Development Platforms: Visual Studio, Visual Studio Code, PyCharm
- Software engineering tools: Git, Rational Rose, Enterprise
- Architecture, ERWin, CCC/ Harvest, Jira.
- OS: Window, Linux, VxWorks.
- Natural Language Processing (NLP): 1 year.
- Robotic software: 3 years

### Experience

- **NLP Software Developer** (Internship) YourQS Ltd. Nov 2020- Feb 2022
- **Principle Software Developer** Zhejiang Jialan Maritime Electronics Co. Ltd. Oct 2015- Dec 2018
- **Senior Software Engineer** The 36th Research Institute of CETC Jul 1998- Sep 2015

---

## IT Graduate

ref: 4151
